Would you have time today to discuss the Cu and TDS blank qualification issue?
For Cu for 1202005 PART 1 - the statement - HW07 is to be qualified "J" - is that because of the FB level on 2/18?

I'm ready to send the response on this one but wanted to check on the Cu blank issue. Are you raising the QL for the FB then putting a J on anything above 10X lik what was done for TDS?

Just putting a J on the result does not indicate enough about the blank contamination.
